

Day-1=>

Student =>

.component.ts=>

```
import { Component, OnInit } from '@angular/core';

@Component({
  selector: 'app-student',
  templateUrl: './student.component.html',
  styleUrls: ['./student.component.css']
})
export class StudentComponent implements OnInit {

  constructor() { }

  ngOnInit(): void {
  }

}
```

Employee=>

.component.ts=>

```
import { Component } from "@angular/core";

@Component({
  selector: 'app-employee', //used for mapping in html
  templateUrl: './employee.component.html', //view file location
  styleUrls: ['./employee.component.css'] //basically this is an array, so
  here we can add more than one css
})

export class EmployeeComponent{

}
```

.cmponent.html=>

```
<h2>Employee Component</h2>
<!-- <app-student></app-student> -->
```

App.component.html=>

```
<!-- <h2>My First Angular Application</h2>
<app-employee></app-employee>
<app-student></app-student>

<app-stringinterpolation></app-stringinterpolation> -->
```

```
<app-propertybinding></app-propertybinding>
```
